number of Spun-off Shares/ total number of Affected Shares before the spin off.

Substitution Method

The Calculation Agent, in order to maintain the same number of Shares in the Basket, as soon as reasonably practicable, after been aware of any event in paragraph A), B) or C) above, will communicate to the parties the new share/s (the "New Share/s") that will be included in the Basket in substitution of the Affected Share/s. The communication will also include the effective date of this Extraordinary Event (the "Substitution Date").

In connection with each Share, each New Share must be part of any relevant exchange in connection with each Share. If possible, each New Share will belong to the same economic sector and geographical area as that of the Affected Share, and will be selected taking into account the variables that affect the quotation of the shares and the derivative instruments which such share is underlying.

Both parties hereby agree and undertake that the New Shares shall be considered acceptable if there is no challenge by any of the parties within two Business Days after the communication.

Both parties also agree that any challenge to the communication must be made by written notice duly signed by a representative with sufficient capacity and delivered to the Calculation Agent to the correct address.

If either party challenges the determination according to the procedure above, the parties agree to appoint a mutually acceptable independent third party (the "Substitute Calculation Agent") that will be appointed within one Business Day following the notice of the challenge. If either party determines that the parties cannot agree on an independent third party, then each party shall select an Independent Leading Dealer (as defined below) in the relevant market. Those elected Independent Leading Dealers shall agree between them a third Independent Leading Dealer, who will perform the determination of the New Shares/s.

"Independent Leading Dealer" means an entity that is a leading dealer in the market for derivative products and is not Controlled directly or indirectly by either of the parties. For this purpose 'Controlled' means ownership of a majority of the voting rights of the entity.

The costs, fees and expenses (if any) of any independent third party called upon to make any calculation or determination shall be borne equally by both parties.

Adjustment of the New Share/s

The Strike Price of the New Share on the Substitution Date (SPNS) will be determined taking into account the proportional increase or decrease in the Affected Share/s price in the period between the moment on which the Strike Price was determined and the Exchange Business Day immediately prior to the Substitution Date. Therefore, the Calculation Agent will make the adjustment according to the following formula:

$$SPNS = CPNS * SPAS / CPAS$$

Where:

"SPNS": Strike Price of the New Share

"CPNS": Closing Price of the New Share on the Exchange Business Day immediately prior to the Substitution Date.

"SPAS": Strike Price of the Affected Shares according to the Confirmation

"CPAS": Closing Price of the Affected Share on the Exchange Business Day immediately prior to the Substitution Date.
